www.technowinitinfra.com

At TechnoWin, we redefine the landscape of IT solutions to harmonize seamlessly with the pulse of your daily business operations. Our dedicated teams bring a fusion of expertise and experience to the table, ensuring a deep understanding of your unique needs. The outcome? Tailored solutions that not only meet but exceed expectations, leaving you consistently satisfied and content.

Pioneering Excellence since 2003

TechnoWin IT Infra Pvt. Ltd was founded in 2003 as a visionary partnership, we have been at the forefront of delivering avant-garde IT-enabled services in many states with our commitment to innovation and customer satisfaction.

Focused Projects for Impactful Results

Our projects have left a lasting impact in the Government sector, catering to local Government bodies, Semi-Government Institutions, and Major Organizations across states. Additionally, our success extends beyond the Public Sector, as we have also undertaken and successfully executed projects for the Private Sector.

Our Processes and Security aspects are assessed and Certified by ISO 9001:2015, ISO/IEC 27001:2013, and CMMI Level 3 Appraised.

Vision

We envision TechnoWin as a global leader, reshaping industries with our transformative software and setting the benchmark for excellence.

Mission

Our mission is to deliver tailored software solutions that elevate businesses, fostering growth and resilience in an ever-changing digital era.

Value Differentiators

We go beyond standard solutions, tailoring our software to meet your unique business needs. With a focus on Innovation, Reliability, and Client-centricity, we stand out as the partner of choice for businesses seeking a competitive edge in the digital realm.

WHY TECHNOWIN?

We at TechnoWin provide unparalleled IT solutions tailored to your business needs. With a proven track record since 2003, we bring expertise and innovation to the table, leaving a positive impact in both Government and Private Sectors. Techno Win is your trusted partner for cutting-edge solutions that elevate your business to new heights, offering a global vision with local commitment and personalized service.

Human Resources Management System (HRMS)

HRMS software is essentially a digital assistant for HR departments. It helps organizations in managing employee data, automate tasks, and gain insights to improve efficiency and decision-making.

HRMS PRODUCT SUIT

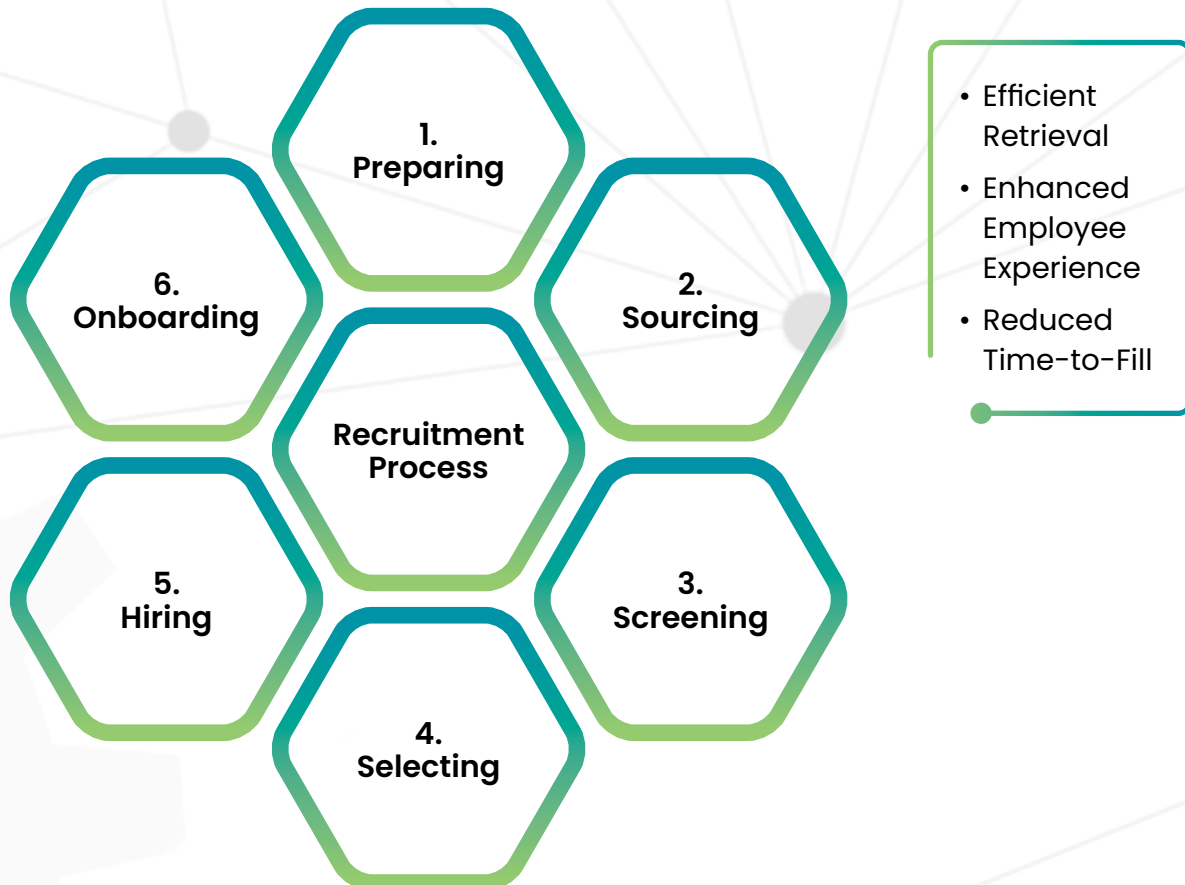

- **Recruitment and Onboarding:** Simplifies hiring and ensures smooth transitions and workflow.
- **Attendance Management:** Automates tracking and managing of employee attendance with different devices and modes of attendance as suitable for the type of Organization.
- **Payroll and Employee Database Management:** Efficiently handle employee compensation and maintain a comprehensive employee database for easy access to information.
- **Self-Service:** Empowers employees to initiate, track and manage tasks, reducing a lot of human intervention and paperwork.
- **Leave Management:** Allows to build the Company leave Policy and handles the time-off requests of the Employees.
- **Mobile Application:** User-friendly design. Employees can seamlessly access it via mobile for convenience and efficiency.

HRMS Modules

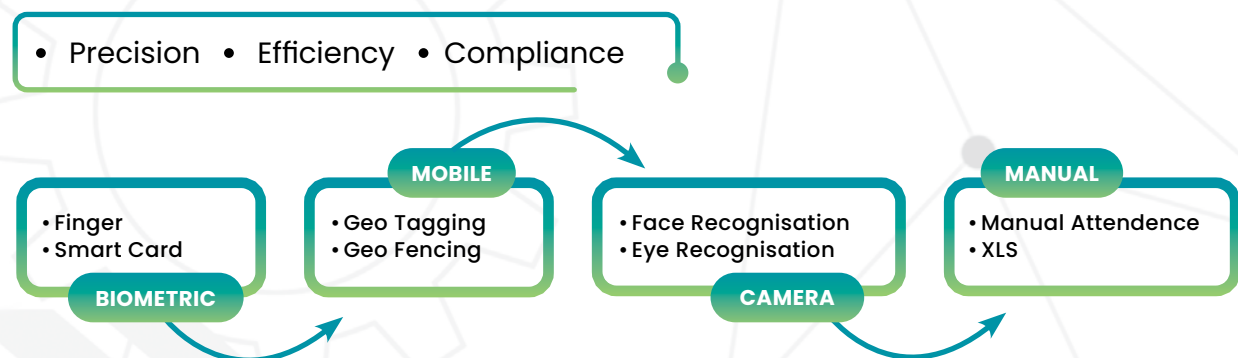

Recruitment and On-boarding System

Streamlines the process of hiring new employees, from posting Job openings to conducting interviews and facilitating a smooth Induction process.

Attendance Management System

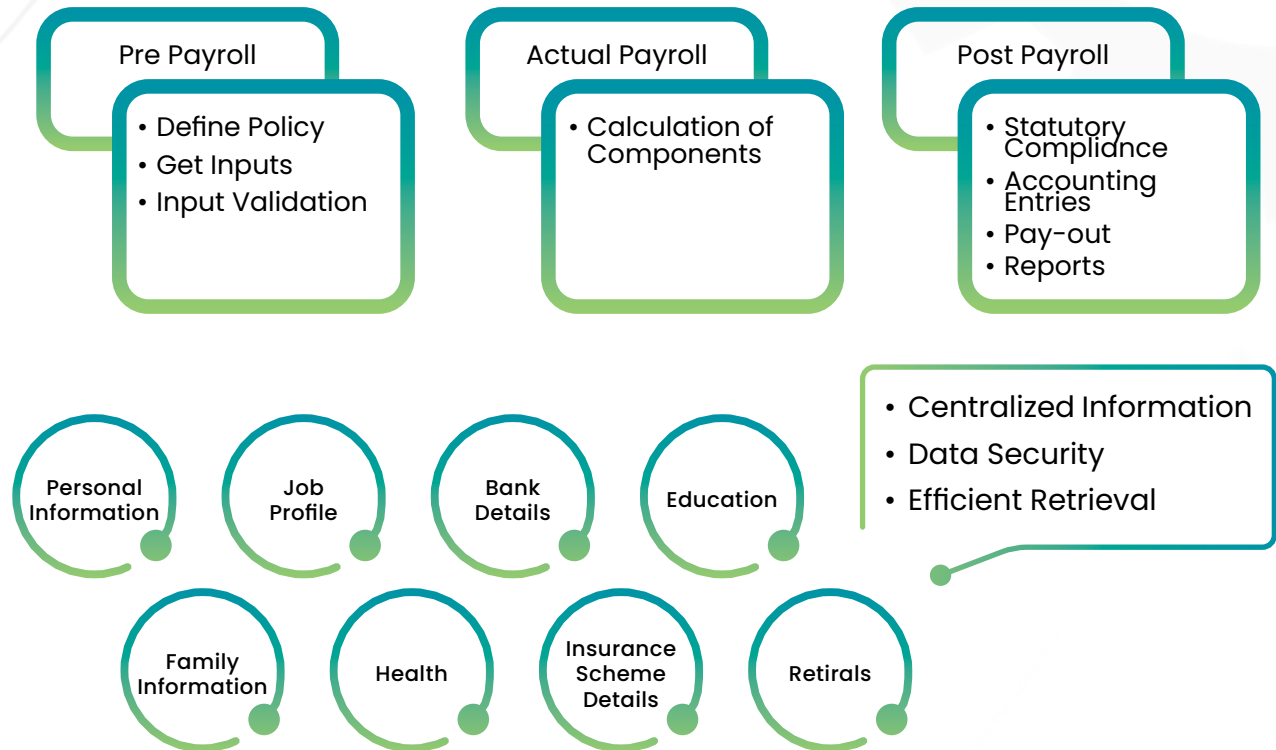

Digitizes and automates tracking of employee attendance, leaves, and working hours. Provides insights for payroll processing, compliance, and workforce planning.

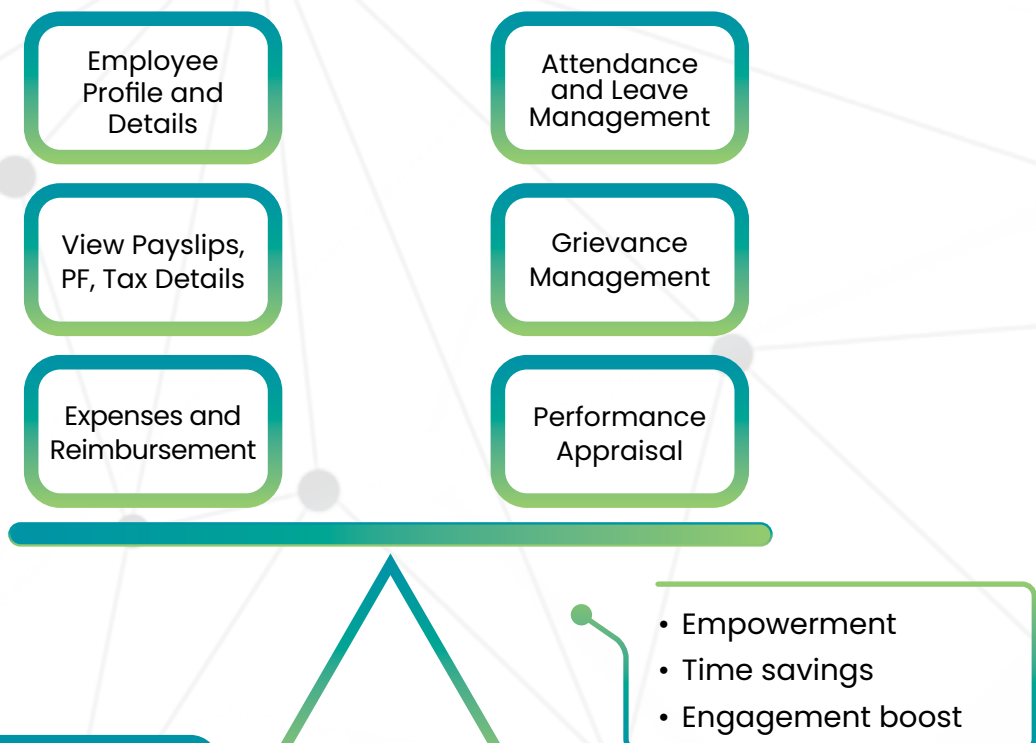

Payroll and Employee Database Management

Efficiently handle employee compensation and maintain a comprehensive employee database for easy access to information.

Employee Self Service

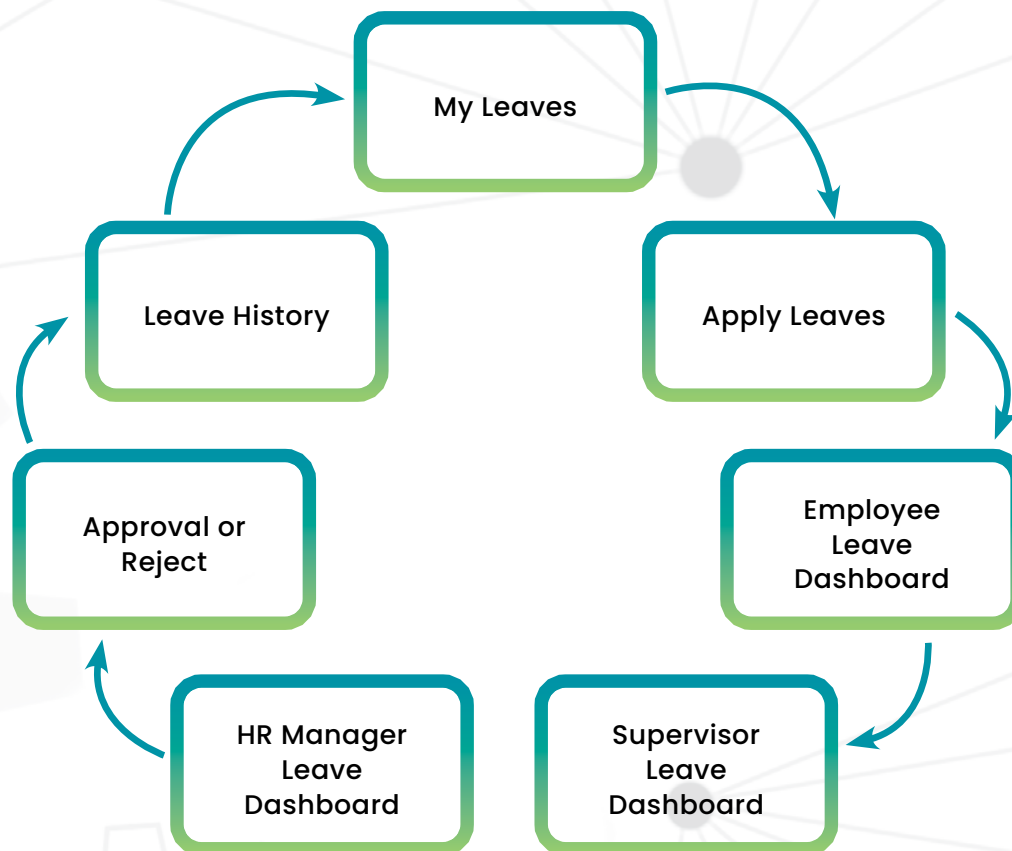

Empowers employees to manage their own HR-related tasks independently. Allows access to personal information, leave requests, and other resources.

Leave Management

Records, Manages, and Tracks time-off requests. Ensures compliance with leave policies, automates payroll adjustments, and enhances Employee Experience.

- Transparency
- Accurate tracking
- Efficiency gains

Mobile Application:

Ensuring a comprehensive solution for all HR needs, Our HRMS software is designed with user-friendliness in mind, allowing employees seamless **access through their mobile phones** for convenient and efficient use. All the features of HRMS modules like marking of attendance and leave with the help of geo-fencing, checking the employee status, and all others can be done with convenience on both the Android and iOS platforms.

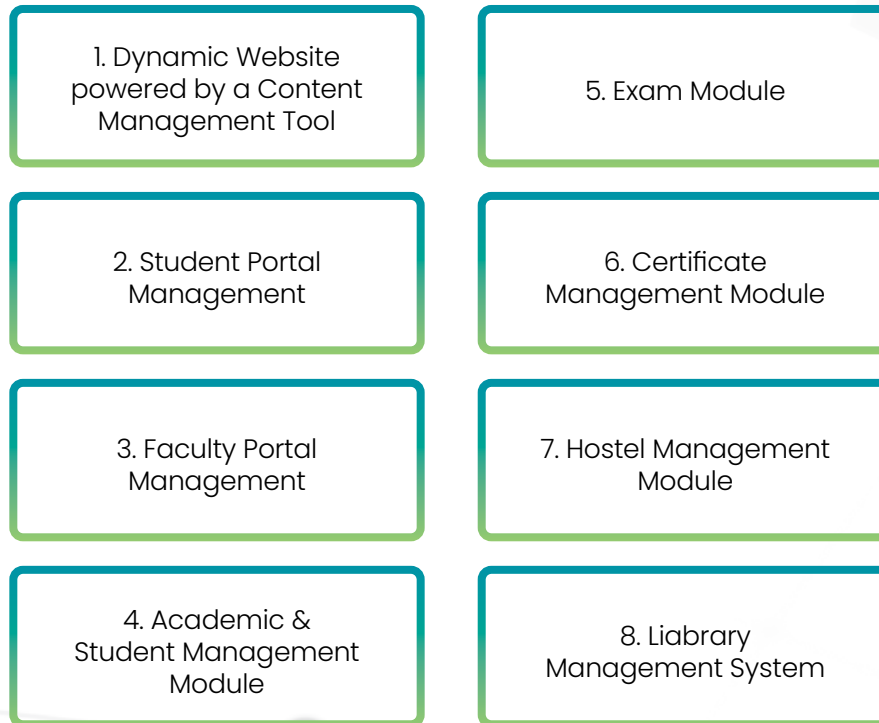

Educational ERP

TechnoWin specializes in crafting Education ERP software, offering a comprehensive solution tailored to streamline and manage diverse administrative, academic, and operational processes within Educational Institutions. Our platform integrates various functionalities into a single, user-friendly interface, facilitating efficient management and informed decision-making.

All the modules we provide-

- **Student Portal Management:** This module provides students with access to personalized information such as course schedules, grades, academic records, and communication tools like messaging or discussion forums.
- **Faculty Portal Management:** Faculty members can use this module to manage their courses, upload course materials, communicate with students, and view academic-related information.
- **Academic and Student Management Module:** This central module handles core academic functions such as enrollment, registration, class scheduling, academic advising, and student records management.
- **Exam Module:** This module facilitates the creation, scheduling, and administration of exams. It may include features for generating exam papers, managing exam timetables, conducting online exams, and recording grades.
- **Certificate Management Module:** Manages the issuance and tracking of certificates, diplomas, and other academic credentials. It could include features for generating digital certificates and verifying their authenticity.
- **Hostel Management Module:** For institutions with on-campus housing facilities, this module handles hostel allocation, room assignments, fee collection, maintenance requests, and other hostel-related operations.
- **Library Management System:** This module provides tools for managing library resources, including cataloging books, tracking borrowing and returns, managing subscriptions, and facilitating online access to digital resources.
